Remember the basics.....

- COVID 19 spreads as a droplet infection- travel for 1-2 m
- Highly contagious (Reproduction rate 2-6)
- Risk of transmission more in closed spaces
- Infectivity is the maximum in the first few days, almost negligible after the first week
- Many infected people (50%) are asymptomatic
- Disease is more severe in men, obese, age > 50 and those with other health problems
- Deterioration happens after 1st week and so the disease gives time
- But once worsening starts, it is very rapid down hill course
- People may not realize they are sick
- Hence close monitoring in at risk important
- Few treatment options
- No vaccine yet

Webinar on "Rubrics." held on 23rd June 2020

Dr. Jayshree Inbaraj giving practical examples on Rubric creation.

Rubrics- Evidenced based

A rubric is a scoring tool that explicitly represents the performance expectations for an assignment or piece of work. A rubric divides the assigned work into component parts and provides clear descriptions of the characteristics of the work associated with each component, at varying levels of mastery.

Teachers use rubrics to support learning. They make assessing the students' work efficient, consistent, objective, and quick. Teachers evaluating an assignment know implicitly what makes that assignment excellent, mediocre, or in need of improvement.

Rubrics show students on what criteria they are going to be evaluated in advance and this helps them to perform better.

The New Way

	LEVEL 4	LEVEL 3	LEVEL 2	LEVEL 1
Knowledge / Understanding	Exceptional	Effective	Acceptable	Developing
Demonstrate an understanding of the topic	thorough understanding	crossable understanding	moderate understanding	emerging understanding
Inquiry / Thinking				
Develops and supports an original idea or opinion about the topic	thorough development and support	considerable development and support	moderate development and support	emerging sense of development and support
Communication				
Addresses audience and speaks clearly with fluency, structure, and purpose	high degree of fluency, structure, and purpose	considerable fluency, structure, and purpose	moderate fluency, structure, and purpose	emerging fluency and sense of structure and purpose
Application				
Executes technical skills such as emphasis, irony, parody, reasoning, and qualifying	high degree of skill	considerable skill	moderate skill	emerging skill
	100%	87%	73%	66%
Overall Grade: C (77%)				

Advantages of rubrics

Student	Teacher
What is wanted on an assignment or task (expectations)	Plan instruction as well as assessment
What a quality performance looks like	Grade consistently
What they do well	Sound justifications for grade
How well they did	Communicate with students
What to do differently next time	Measure if outcomes are achieved
Self learn and assume more responsibility	Focus on criteria not just the overall task
Peer learning	Consistency in grading
Helps parents to guide students	Saves teachers time
