**environmental concerns were minimal in Gandhi's time; but eminent environmental writers like Ramachandra Guha consider him an early Environmentalist.<sup>2</sup> His views on nature are scattered throughout his writings. His ideas relating to Satyagraha based on truth and non violence, simple life style, and development reveal how sustainable development is possible without doing any harm to nature and our fellow beings. His idea that "nature has enough to satisfy every one's needs, but not to satisfy anybody's greed" became one line ethic to modern environmentalism.**
